INTERNATIONAL HEALTH SERVICE – Project Suitability Form (required of first time participants only)

IHS projects are not for everyone as some locations are very remote and some people react differently when placed in a situation different from their normal life. To assist you in determining if this project is right for you and to assist us in placing you on the correct team, please complete this form and return with your application.

All IHS projects begin in La Ceiba, Honduras. Upon arrival participants will stay one or two nights in a hotel or with a local host family during our orientation programs. Teams will also return to La Ceiba at the end of the project, usually for one night, for debriefing, storing supplies and equipment plus a farewell dinner. Also, many repeat participants return to the same location as they get to know the local people.

The following questions are not meant to discourage you. Instead we hope they give you an understanding of the places we go and challenges that may happen.

Briefly describe any camping, hiking, or adventure trip experience you may have had. _____

Remote areas of Honduras have limited electricity or modern transportation and few telephones. Many IHS participants return year after year so they understand this change of life and the experience of helping people in this environment. Can you honestly say you can handle 8 to 10 days in locations that have solar showers, outhouses, bugs, humidity and the possibility of sleeping in a screen tent? _____ Comments: _____

For many, the time at the team site will be spent in a remote location away from telephones and TV with people who speak a different language, use different money, and have different habits, values and social norms. Can you handle being disconnected from friends and family for two weeks? _____ How do you plan to keep busy during quiet/slow hours? _____

Most of Honduras experiences a hot and humid climate. Mountain teams may get chilly at night. Many participants will do a lot of walking on uneven ground, carrying their own bags, lifting, moving, loading, and unloading many boxes of supplies. Can you do your share of the work and are physically up to going on this trip? _____

Frustration can happen on the trip. You are in a foreign country where Murphy's law can happen. You may experience "hurry up and wait". You will be with a group of people you have never been with before and interacting with a different culture. All this can be challenging. How do you handle frustration? _____
Does your temperament allow you to "not sweat the small stuff"? _____

IHS teams may see many patients, which can require long days. Some teams will be working in hot, humid locations. How is your temperament and physical stamina in times like this? _____

Teams that have the most enjoyable experience work together with each team member contributing their part to the group's overall function. This requires you to do your job well every day, trusting others to do their job, and always stepping up to help with the small tasks that need to be done every day. To what extent are you a team worker? _____

There will be times when people work with patients in their own specialty. However, many tasks require the help of ALL team members working as a team. Group decisions are made when possible but the Team Leader has final say. Can you work within a group and be respectful of decisions made? _____

*** **February team only**... some team sites have limited local communications so they also have ham radio operators who use radios to talk with the Admin team and Project Director in La Ceiba plus the logistics team in Puerto Lempira. There is telephone and/or cell phone use at some team sites. Many radio operators also have a limited e-mail capability. In the unlikely event of an emergency the Project Director and all radio operators work together to make sure the correct people are notified as soon as possible. Because electricity and other services are not available all the time, we need to understand that everyone will do their best to be timely but things do not always happen instantly. Participants need to tell family and friends at home about this situation. As with all details of each team site, participants will get information from their Team Leader about what communications and site facilities will be available for their use.
